How to read these figures

A blank **Case #** field does not by itself establish an improper search. Some entries may contain identifiers in the Reason field or may have documentation outside this public export. Likewise, the **Total Networks Searched** value reflects the scope shown in the audit log for a particular event; it should not be interpreted as proof that every network returned data or that Gulfport shared its own data with every network.

The public exports show the **License Plate** field blank in every row. That limits independent analysis of repeated searches involving the same vehicle across different dates or users.
